What are cookies?

Cookies are small data files sent by a website's server to a web browser, processor memory or hard drive and stored there. They can be used for a range of different purposes, such as customising a website for a particular user, helping a user navigate a website, improving that user's website experience, and storing that user's preferences and login information.

Session and persistent cookies

First and third party cookies

Cookies can be classified as 'first party' or 'third party'.

First party cookies: these are cookies placed on your device by our website domain.

Third party cookies: these are cookies placed on your device by third party website domains.

Other technologies

Web beacons

We and any marketing companies we use also embed web beacons in our marketing emails and/or on our website. Web beacons are small GIF image files which enable us to track your receipt of our marketing emails, how often you view our adverts or website pages, your location, IP address and browser information. Web beacons are activated whenever you open a marketing email or access a page on our website which contains a web beacon. Web beacons transmit data when you view them but are not capable of accessing any other information on your computer. Web beacons are not stored on your hard drive unless you download a GIF image containing them.

Some (but not all) browsers enable you to restrict the use of web beacons by either preventing them from sending information back to their source (for example, when you choose browser settings that block cookies and trackers), or by not accessing the images containing them (for example, if you select a 'do not display images (in emails)' setting in your email server).
